

## Brief Report

The Compact Course program on Complex Analysis was conducted at Central University of Kerala from 9<sup>th</sup> -21<sup>st</sup> February 2015. It was attended by I year M.Sc. students (22). Four faculty member of CUK attended the CC program throughout.

The entire participants took keen interest in understanding the subject. They are interactive, alert and more attentive. Because of their enthusiasm we extended the duration of lecture hours. We followed the following time schedule

Lecture by the main faculty: - 9.30 am- 1.00 pm (Tea break 11.00-11.15)

Lecture/tutorial by Associate faculty: 2.00p.m-3.45 pm

We were able to complete the full syllabus. No result / Theorem have been omitted. We explain all the concepts in detail. Lot of problems have been worked out. Daily, some problems (on the portion covered on the day) were given to the student participants as home work. We were happy to note that almost all the students worked out the homework problems correctly. The lectures were well received by the students. More than 50% of the student participants are bright. We were able to identify 6 or 7 bright students.

All the faculty members have extended the full cooperation to make this CC program a success. I owe them a lot.
