S. Minakshisundaram By K. G. Ramanathan	xix
Tauberian theorems on Dirichlet's series, <i>J. Indian Math. Soc. (N.S.)</i> <b>2</b> , (1936), 147–155.	309–317
On the extension of a theorem of Caratheodory in the theory of Fourier series, <i>J. Indian Math. Soc. (N.S.)</i> <b>2</b> , (1937), 314–320.	319–325
The Fourier series of a sequence of functions, <i>J. Indian Math. Soc. (N.S.)</i> <b>2</b> , (1937), 314–320.	327–329
A Tauberian theorem on $(\lambda, k)$ -process of summation, <i>J. Indian Math. Soc. (N.S.)</i> <b>3</b> , (1938–39), 124–130.	365–368
On V. Ramaswami's Tauberian theorem on oscillation, <i>J. Indian Math. Soc. (N.S.)</i> <b>3</b> , (1938–39), 131–135.	369–373
On an infinite system of non-linear integral equations, <i>Proc. Indian Acad. Sci.</i> <b>8</b> , (1938), 238–242.	335–339
On an infinite system of non-linear integro-differential equations, <i>Proc. Indian Acad. Sci. (A)</i> <b>9</b> , (1938), 410–418.	403–413
On the theory of non-linear partial differential equations of the parabolic type, <i>J. Indian Math. Soc. (N.S.)</i> <b>3</b> , (1938–39), 237–247.	375–384
On non-linear partial differential equations of the parabolic type, <i>Proc. Indian Acad. Sci. (A)</i> <b>9</b> , (1939), 479–494.	385–401

On non-linear partial differential equations of the hyperbolic type <i>Proc. Indian Acad. Sci. (A)</i> <b>9</b> , (1939), 495–503.	341–349
On generalised Tauberian theorems, <i>Math. Z.</i> <b>45</b> , (1939), 495–506.	351–363
On the roots of a continuous non-differentiable function, <i>J. Indian Math. Soc. (N.S.)</i> <b>4</b> , (1940), 31–33.	305–307
On the expansion of an arbitrary function in a series of eigen- functions of boundary value problems, <i>Proc. Indian Acad. Sci., Sect. A</i> <b>12</b> , (1940), 462–465.	301–304
A note on the theory of infinite series, <i>Math. Student</i> <b>9</b> , (1941), 78–81.	289–293
On the expansion of an arbitrary function in a series of eigen- functions of boundary value problems II, <i>J. Indian Math. Soc. (N.S.)</i> <b>5</b> , (1941), 103–108.	295–299
On expansion in eigenfunctions of boundary value problems III. The summability problem, <i>J. Indian Math. Soc. (N.S.)</i> <b>6</b> , (1942), 153–167.	273–287
Studies in Fourier Ansatz and parabolic equations, <i>J. Madras Univ.</i> <b>14</b> , (1942), 73–142.	435–482
Studies in Fourier Ansatz and parabolic equations, <i>J. Indian Math. Soc. (N.S.)</i> <b>6</b> , (1942), 41–50.	263–271
On expansion in eigenfunctions of boundary value problems IV, <i>J. Indian Math. Soc. (N.S.)</i> <b>7</b> , (1943), 17–24.	255–261
On expansion in eigenfunctions of boundary value problems V, <i>J. Indian Math. Soc. (N.S.)</i> <b>7</b> , (1943), 89–95.	247–253
On expansion in eigenfunctions of boundary value problems VI, <i>Bull. Calcutta Math. Soc.</i> <b>35</b> , (1943), 81–84.	241–245
Fourier Ansatz and non-linear parabolic equations, <i>J. Indian Math. Soc. (N.S.)</i> <b>7</b> , (1943), 129–142.	229–240

A new summation process, <i>Math. Student</i> <b>11</b> , (1943), 21–27.	221–227
A note on the theory of Fourier series, <i>Proc. Nat. Inst. Sci. India</i> <b>10</b> , (1944), 205–215.	209–219
On the differentiated series of eigenfunctions, <i>J. Indian Math. Soc. (N.S.)</i> <b>8</b> , (1944), 75–78.	205–207
Notes on Fourier expansion (I), <i>J. London Math. Soc.</i> <b>20</b> , (1945), 148–153.	199–204
On a Tauberian theorem of K. Ananda Rau (with C. T. Rajagopal), <i>Quart. J. Math., Oxford Ser.</i> <b>17</b> , (1946), 153–161.	189–197
Notes on Fourier expansions (II), <i>J. London Math. Soc.</i> <b>21</b> , (1946), 264–267.	185–188
On absolute convergence of multiple Fourier series (with Otto Szász), <i>Trans. Amer. Math. Soc.</i> <b>61</b> , (1947), 36–53.	165–183
A uniqueness theorem for eigenfunction expansions, <i>Proc. Nat. Acad. Sci. U.S.A.</i> <b>33</b> , (1947), 76–77.	161–163
Some results on double Fourier series (with K. Chandrasekharan), <i>Duke Math. J.</i> <b>14</b> , (1947), 731–753.	137–159
Postscript to a Tauberian theorem (with C. T. Rajagopal), <i>Quart. J. Math., Oxford Ser.</i> <b>18</b> , (1947), 193–196.	133–136
An extension of a Tauberian theorem of L. J. Mordell (with C. T. Rajagopal), <i>Proc. London Math. Soc. (2)</i> <b>50</b> , (1948), 242–255.	119–132
Notes on Fourier expansions III. Fourier Stieltjes Series, <i>Amer. J. Math.</i> <b>71</b> , (1949), 60–66.	111–118
Some properties of the eigenfunctions of the Laplace-operator on Riemannian manifolds (with Å. Pleijel), <i>Canadian J. Math.</i> <b>1</b> , (1949), 242–256.	95–110
Zeta functions on the sphere, <i>J. Indian Math. Soc. (N.S.)</i> <b>13</b> , (1949), 41–48.	87–93

A generalization of Epstein Zeta functions. With a supplementary note by Hermann Weyl, <i>Canadian J. Math.</i> <b>1</b> , (1949), 320–327.	79–86
Expansion in eigen-functions of the membrane problem, <i>Proceedings of the symposium on Spectral Theory and Differential Problems</i> , Oklahoma Agricultural and Mathematical College, Stillwater, Oklahoma, (1951), 317–323.	415–420
Lattice point problems and eigen-value problems, <i>Proceedings of the symposium on Spectral Theory and Differential Problems</i> , Oklahoma Agricultural and Mathematical College, Stillwater, Oklahoma, (1951), 325–332.	421–428
Zeta functions on the unitary sphere, <i>Canadian J. Math.</i> <b>4</b> , (1952), 26–30.	73–77
Eigenfunctions on Riemannian manifolds, <i>J. Indian Math. Soc. (N. S.)</i> <b>17</b> , (1953), 159–165.	67–72
A note on typical means (with K. Chandrasekharan), <i>J. Indian Math. Soc. (N. S.)</i> <b>18</b> , (1954), 107–114.	61–66
On the structure of unitary symplectic groups, <i>J. Indian Math. Soc. (N. S.)</i> <b>19</b> , (1955), 105–120.	47–59
Hilbert algebras, <i>Proc. Internat. Congress Math.</i> , Edinburgh (1958), 407–411, Cambridge University Press (1960).	331–334
On the product of Dirichlet series, <i>J. London Math. Soc.</i> <b>37</b> , (1962), 90–102.	33–45
Convexity theorem for absolute summability, <i>Proc. Nat. Inst. Sci. India Part A</i> <b>28</b> , (1962), 347–351.	429–434
On the multiplication of Dirichlet series, <i>Math. Z.</i> <b>79</b> , (1962), 44–52.	23–32
Summability of eigenfunction expansions, <i>Math. Z.</i> <b>83</b> , (1964), 321–335.	5–22
A note on summability by Riesz means, <i>Indian J. Math.</i> <b>9</b> , (1967), 473–476.	1–3
