

## CONTENTS

- On Iwasawa theory of elliptic units and 2-ideal class groups  
*Hassan Oukhaba* 255–273
- Special relations between multizeta values and parity results  
*José Alejandro Lara Rodríguez* 275–293
- Potential density for some families of homogeneous spaces  
*J.-L. Colliot-Thélène and J. N. Iyer* 295–303
- A complete classification of limits of splitting interval algebras  
with the ideal property *Chunlan Jiang and Kun Wang* 305–354
- On the arithmetic of the discriminant for cubic surfaces  
*Andreas-Stephan Elsenhans and Jörg Jahnel* 355–373
- On the proof of the genus bound for Enriques–Fano threefolds  
*Andreas Leopold Knutsen, Angelo Felice Lopez  
and Roberto Muñoz* 375–395
