Contents

An Extremal Problem in Combinatorial Number Theory
*Sukumar Das Adhikari*  1–11

Combinatorial Properties of $n$-Colour Compositions  
*A. K. Agarwal*  13–28

Partial Theta Identities of Ramanujan, Andrews, and Rogers-Fine
Involving the Squares  
*Krishnaswami Alladi*  29–53

On the $K(n)$-Invariants of a Supersingular Representation of $GL_2(\mathbb{Q}_p)$
*U. K. Anandavardhanan and Gautam H. Borisagar*  55–75

The Discovery of Ramanujan’s Lost Notebook  
*George E. Andrews*  77–88

Ramanujan and Quasi-Modular Forms  
*R. Balasubramanian and S. Gun*  89–98

Two Quotients of Theta Functions and Arithmetic Identities for 3-Cores
*Nayandeep Deka Baruah and Kallool Nath*  99–110

The Circle and Divisor Problems, and Ramanujan’s Contributions through
Bessel Function Series  
*Bruce C. Berndt, Sun Kim and Alexandru Zaharescu*  111–127

On $q$-Difference Equations for Partitions without $K$-Sequences
*Kathrin Bringmann, Jeremy Lovejoy and Karl Mahlburg*  129–137

Recent Work on the Partition Function
*Jan Hendrik Bruinier, Amanda Folsom, Zachary A. Kent and Ken Ono*  139–151

Some Remarks on the Resnikoff-Saldaña Conjecture
*Soumya Das and Winfried Kohnen*  153–161

Ramanujan’s Ingenious Method for Generating Modular-Type
Transformation Formulas  
*Atul Dixit*  163–179
Ramanujan-Type Formulae for $1/\pi$: The Art of Translation

*Jesús Guillera and Wadim Zudilin*  
181–195

On Ramanujan Graphs and Complexes

*Wen-Ching Winnie Li*  
197–211

On the $q$-Partial Differential Equations and $q$-Series

*Zhi-Guo Liu*  
213–250

Shifted Convolution of Divisor Function $d_3$ and Ramanujan

$\tau$ Function

*Ritabrata Munshi*  
251–260

The Partition Function Revisited

*M. Ram Murty*  
261–279

Ramanujan and Prime Numbers

*V. Kumar Murty*  
281–299

Recent Progress on the Exterior Square $L$-Function of $GL_n$

*Ravi Raghunathan*  
301–322

Comparison Results for Certain Periods of Cusp Forms on $GL_{2n}$ over a Totally Real Number Field

*A. Raghuram*  
323–334

Representation of Integers as Chromatic Sums of Primes

*D. S. Ramana*  
335–346

Aspects of Elliptic Hypergeometric Functions

*V. P. Spiridonov*  
347–361

Some Problems of ‘Partitio Numerorum’: Hybrid Expressions

*R. C. Vaughan*  
363–385

From Highly Composite Numbers to Transcendental Number Theory

*Michel Waldschmidt*  
387–397

Orbital Integrals and Dedekind Zeta Functions

*Zhiwei Yun*  
399–420
