

Contents

1	List-colorings and the Number of Colorings of a Graph	1
	<i>Carsten Thomassen</i>	
2	Homomorphisms, Dualities and CSP	9
	<i>Jaroslav Nešetřil</i>	
3	Introduction to the Minimum Cost Homomorphism Problem for Directed and Undirected Graphs	25
	<i>Gregory Gutin</i>	
4	Refinements of Ramanujan’s Congruence Modulo 5	39
	<i>Herbert S. Wilf</i>	
5	Almost Ramsey Type Theorems for Directed Graphs	43
	<i>S.B. Rao and Sushmita Ruj</i>	
6	Some Recent Results on Domination in Graphs (An Extended Abstract)	55
	<i>M.D. Plummer</i>	
7	Resistance Matrix and q-Laplacian of a Unicyclic Graph	63
	<i>R.B. Bapat</i>	
8	A Discussion of Constrained Binary Embeddings with Applications to Cryptanalysis of Irregularly Clocked Stream Ciphers	73
	<i>Diane M. Donovan, James Lefevre and Leonie Simpson</i>	
9	Disjoint Dominating Sets in Graphs	87
	<i>Sandra M. Hedetniemi, Stephen T. Hedetniemi, Renu C. Laskar, Lisa Markus and Peter J. Slater</i>	
10	On the Complexity of the Geodetic and Convexity Numbers of a Graph	101
	<i>Mitre C. Dourado, Fábio Protti and J. L. Szwarcfiter</i>	
11	Non-binary Codes via the Trace Map	109
	<i>Asha Rao and N. Pinnawala</i>	

12	Vertex Identifying Codes for Fault Isolation in Communication Networks	115
	<i>Krishnaiyan Thulasiraman, Min Xu, Ying Xiao and Xiao-Dong Hu</i>	
13	On the Berge's k-Optimal Path Partition Conjecture	125
	<i>Sriraman Sridharan</i>	
14	Circular Perfect Graphs	131
	<i>Xuding Zhu</i>	
15	Generalized Colourings and Matrix Partitions	141
	<i>Pavol Hell</i>	
16	Applications of Orthogonal Arrays to Computer Science	149
	<i>K. Gopalakrishnan and Douglas R. Stinson</i>	
17	Forbidden Intersection Patterns in the Families of Subsets	165
	<i>Gyula O.H. Katona</i>	
18	Directed Odd Cycle Decompositions of Some Regular Digraphs	175
	<i>R.S. Manikandan, P. Paulraja and S. Sivasankar</i>	
19	Packing and Domination Invariants on Cartesian Products and Direct Products	183
	<i>Douglas F. Rall</i>	
20	Independent Domination and Graph Colorings	195
	<i>S. Arumugam, I. Sahul Hamid and A. Muthukamatchi</i>	
21	Graph Equivalences and Decompositions Definable in Monadic Second-Order Logic. The Case of Circle Graphs	205
	<i>Bruno Courcelle</i>	
22	Restrained Domination in Graphs	217
	<i>Johannes H. Hattingh</i>	
23	Some Properties of the Clique Graph of a Cograph	227
	<i>S. Aparna Lakshmanan and A. Vijayakumar</i>	

24	\hat{S}_k-Factorization of Symmetric Digraph of Tensor Product of Graphs	233
	<i>P. Hemalatha and A. Muthusamy</i>	
25	Some New Degree Concepts in Graphs	237
	<i>S.S. Kamath and R.S. Bhat</i>	
26	The Edge C_4 Graph of a Graph	245
	<i>Manju K. Menon and A. Vijayakumar</i>	
27	Topological Properties of the Set of All Minimal Dominating Functions of Graphs	249
	<i>K. Reji Kumar</i>	
28	γ_t-Graph of a Graph G	255
	<i>S. Amutha and N. Sridharan</i>	
29	Some Combinatorial Results on Pcodes	263
	<i>K. Sasikala, V.R. Dare and D.G. Thomas</i>	
30	Characterizing Defect 1-Extendable Bipartite Graphs and an Algorithm	271
	<i>Xuelian Wen and Dingjun Lou</i>
